

Prepare your InDesign file at 50% of its final output size.

i.e. 1075 x 425mm to achieve 2150 x 850mm Banner
Make sure all images are at 300dpi at 100% of the placed size in your file.

The diagram illustrates the relationship between the image area and the bleed area for a banner. A central horizontal line with arrows at both ends represents the image area, which is 2000 mm wide and 850 mm high. A vertical line with arrows at both ends represents the bleed area, which is 142 mm wide and 850 mm high. The bleed area is shown as a light purple shaded region at the bottom of the page, extending 71 mm from the bottom edge of the image area. A dashed horizontal line is drawn at the top of the page, indicating the final output size of 2150 mm width.

Image Area
2000 x 850mm

Bleed Area
142 x 850mm
